## What to do

IMPORTANT Parent or Carer —
Please check that you are happy with any weblinks or use of the internet.

## 1. Counting practice

- Count to 100 with your child!
- You can either do this alone or along with an animation https://www.youtube.com/watch?v=bGetqbqDVaA

- o In either case, ask your child to show fingers to match the units.
  - Hold up 1 finger for each number spoken to 5. Then wave the hand to show five fingers.
  - Hold up 1 finger on the second hand for each number from 6 to 10 and wave both hands to show 10 fingers.
  - Continue these actions through each set of 10, from 11 to 20, from 21 to 30, and so on.

#### Extension

o Ask your child if they can count back from 90 to 70. This is hard!

# 2. Working together

- Play More or Less as outlined below
  - Find some small items that can be placed in a bowl to be estimated. Suitable things include: Lego<sup>™</sup> bricks, buttons, beads, small pebbles, conkers, dried beans, raisins, etc.
  - You need about 50-60 of these.

## **Try these Fun-Time Extras**

- Find a short stick or use a fork, holding it by the prongs end.
- Use this like a drum stick and find a safe table to act as the drum.
- Beat a short pattern of drum beats, e.g. Dum, dum, de, de, dum, dum, de, de.
- Ask your partner how many beats you did. You will have to repeat it, and even so it is very hard to count! Now you have a turn at guessing.

# More or Less

· 在在在在在在在在在在在在在在在在在在在在在在在在在

You need small countable items – e.g. Lego™ bricks, buttons, beads, small pebbles, conkers, dried beans, raisins, etc.

# How to play

- o Take two or three handfuls of items.
- Place these in a largish bowl.

 You and your partner should each separately estimate how many there are. You have to guess in the following categories

| Fewer than 10 | Between   | Between   | More than |
|---------------|-----------|-----------|-----------|
|               | 10 and 20 | 20 and 30 | 30        |

Each of you must say – you can use the colour to show your estimate.

Tim says

Mum says grey

- Together count the items into sets of 10. How many are there in all?
- o The person whose estimate was closest takes a 10p coin!
- o Play until one person has 50p.
