# On the Beach Rounding

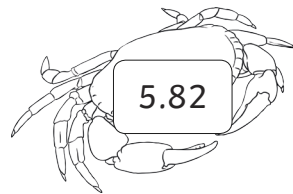

I can round a number with two decimal places to one decimal place.

## Instructions:

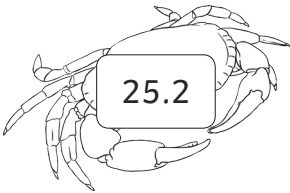

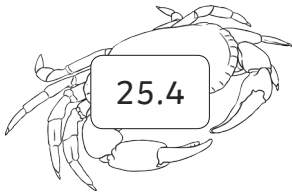

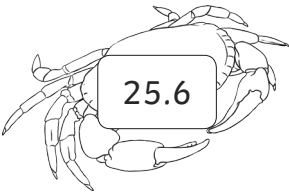

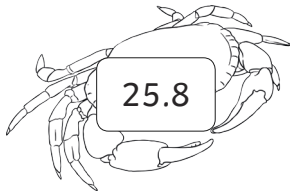

Place your counter on any square of the game board to start and take it in turns to roll the dice.

On your turn, move your counter clockwise around the game board, rounding the number you land on to one decimal place.

If the answer is a crab, you score a point, but if the answer is a starfish, the other player scores the point.

The first player to ten points wins!

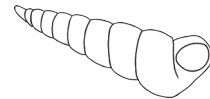

25.15	25.67	25.49	25.75	25.26	25.88	25.59	25.99
25.51							25.38
25.29							25.45
25.92							25.18
25.37							25.78
25.95							25.57
25.62	25.13	25.22	25.87	25.74	25.44	25.69	25.31

# On the Beach Rounding

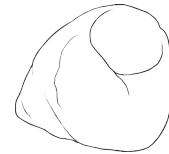

I can round a number with two decimal places to one decimal place.

The crabs are all trying to reach their shells. Round the decimal number on each crab to one decimal place, writing the answer on the correct shell.
